 	<p>BCSD-UK 1st Pathway Workshop – focus on Skanska</p> <p>BCSD-UK member and internationally operating sector leader Skanska was the focus of our pilot Pathway 2011 Workshop held on March 30th. Operations Director Jason Tucker speaking from London Docklands highlighted the practical side of delivering sustainable development values. The World Business Council's Director of Communications, Peter Paul van de Wijs, speaking from Geneva, provided a progress report on their 2050 Vision project.</p> <p>Content from this event can be seen via www.bcsd-ukpathways2011.com</p> <p><i>“I have to say that the Skanska contribution was most inspiring” - Marietta Di Ciacca, PA Consulting who attended the London Docklands workshop.</i></p> <p><i>“Very worthwhile” - Andrew McKnight, Marley Eternit who was at the Birmingham event.</i></p>
	<p>BCSD-UK Report From Localised Manufacturing Workshop</p> <p>A closed to members event held to Chatham House rules was hosted at the London offices of Tata Steel Europe. Reports from the event are available to members on request to davidm@ebc-info.co.uk. A number of potential forward actions were identified and these are currently being considered as to how best to action them. Those attending agreed to form themselves into a BCSD-UK sub-group under the Chairmanship of Ian Goldsmith of Tata Steel Europe.</p>
	<p>World Business Council Report from Montreux</p> <p>The WBCSD has now released a full and useful report from its annual LD Meeting in Montreux in March. Copies available to members on request to davidm@ebc-info.co.uk</p>

	<p>BCSD-UK Secretariat Offers Intern Opportunities</p> <p>The Birmingham based secretariat office of the BCSD-UK is offering places to graduates and post-graduates who are keen to enter the sustainable development/environmental business world. Those with skills in data management and communications would be particularly welcomed. Contact davidm@ebc-info.co.uk for more information.</p>
	<p>ITM Sells Hydrogen Production System To University of Glamorgan</p> <p>BCSD-UK member ITM Power (AIM: ITM), the energy storage and clean fuel company, has announced the sale of its first small-scale bespoke hydrogen production system to the University of Glamorgan (UoG) under a competitive tender process. The Proton Exchange Membrane electrolyser system will supply around 4kg of hydrogen per day, based on the Company's HFuel@ product platform. For full story visit the ITM Power website</p>
